KC Preparedness Crosswalk: FIFA World Cup 2026 Readiness Assessment

Research backbone for a forthcoming policy brief — Kansas City metro emergency management stakeholders and policymakers — research compiled May 2, 2026.

TL;DR

- **Kansas City has made dramatic, late-cycle gains in 911 capacity, multilingual call-taking (RapidSOS HARMONY AI), and inter-jurisdictional command structure**, with a $59M federal FIFA World Cup Grant Program (FWCGP) award flowing through MARC and a Missouri Executive Order (26-11) activating the State Emergency Operations Plan and ~110 National Guard members from June 11 through July 31, 2026. KCPD reports 911 wait times reduced ~60% in 2025 and full call-taker staffing for the first time since 2020.
- **The most significant remaining preparedness unknowns are (a) tail-end 911 answer time under simultaneous-event surge (compound hazmat + crowd + weather), (b) multilingual dispatch ontology mismatch for non-English callers using foreign emergency-service vocabulary, (c) IPAWS/WEA cross-jurisdictional alerting authority and multilingual WEA capability, and (d) EMS mutual-aid funding outside the immediate metro.** Heat exposure during a June–July tournament in a continental-climate metro is the highest-probability stressor; flash flooding (Brush Creek/Indian Creek corridors) is the highest-consequence low-probability stressor.
- **Compared to peer host cities (Seattle's 40-agency unified command, Dallas/Houston's larger state grants, Doha's 57-recruit multilingual telecommunicator buildout for 2022)**, KC's posture is competitive in technology adoption but constrained by being the smallest U.S. host city by metro population while operating "one of the largest overall footprints" (Deputy Chief Mabin testimony) — six matches, four team base camps, and 18 days of Fan Festival programming, with ~650,000 expected visitors. (KCUR) (Hoodline)

Key Findings

Executive Crosswalk Table

Domain	Current Posture (May 2026)	Benchmark / Standard	Gap or Risk Flag
PSAP staffing	50 call-takers + 30 dispatchers; (KCTV) full funded staffing as of Nov 2025; ~1M calls/yr	NENA: 90% answered	Met goal in late 2025/early 2026; tail-

Domain	Current Posture (May 2026)	Benchmark / Standard	Gap or Risk Flag
(KCPD)	KCTV	⩽15s, 95% ⩽20s	end (95th percentile) under surge unverified
911 wait time	20 sec avg (Jan 2026); KCTV down from 55s avg / 17-min tail (May 2025)	NENA standard	"Significantly improved but tail-end surge data not public"
Multilingual 911	RapidSOS HARMONY AI live since early 2026; ~50 languages voice / ~147 text KCTV	No federal mandate; FIFA expects parity	AI translation untested at FIFA scale; dispatch ontology mismatch risk for non-English emergency vocabulary remains
FY2026 911 budget	KCPD +5%; mayor proposes hiring 50 officers + 20 call-takers/dispatchers; $3–3.5M call-center upgrade in scoping KCTV	—	Sustainability after federal grant sunset (July 31, 2026) unclear
Federal FIFA grant	$59M FWCGP to MO/KS via MARC; KCUR $14.2M counter-UAS; $625M national pool	—	Funds released March 2026 after partial shutdown delay
Match dates / venue	6 matches at GEHA Field at Arrowhead ("Kansas City Stadium"): Jun 16, 20, 25, 27; Jul 3 (R32); Jul 11 (QF)	—	Late kickoffs (some 9–10 PM ET) push EMS surge into overnight hours
Fan Festival	National WWI Museum & Memorial; ⩾18 operating days; free admission	—	Same site as 2024 parade-shooting MCI footprint
Unified command	Missouri EO 26-11 activates SEMA Plan; MO Nat'l Guard QRF (~110); MSHP, FBI, DHS, KCPD; KCKPD; Regional Coordination Center	NIMS / ICS	Bistate (MO/KS) command details not publicly released
IPAWS/WEA authority	Multiple COGs in region (KCMO, Johnson Co. KS, Wyandotte Co., Jackson Co., MARC partners, NWS Pleasant Hill); state-level via MO DPS / KS Adjutant General	FEMA IPAWS doctrine	No publicly documented multilingual WEA capability for KC; activation latency in

Domain	Current Posture (May 2026)	Benchmark / Standard	Gap or Risk Flag
			compound emergency unverified
Hospital surge	KU Health System = Official Medical Provider; planning for 6–8% healthcare surge; KU Hospital Level I trauma; The University of Kansas H… University Health Truman Level I (48 ED beds, 62K visits/yr); University Health Children's Mercy Level I peds Children's Mercy Kansas City + burn center	—	Med-Act (JoCo) flagged absence of state/federal funding to bring EMS in from outside metro
Heat protocols	FIFA stadium hydration breaks; NBC 6 South Florida cooling/medical stations in fan zones; KU Health planning around heat illness mitigation	NWS/CDC heat–health guidance	NOAA summer 2026 outlook (CPC, April 2026): central US near-normal temps; some forecasts trend warmer; June match temps historically 75–95°F at Arrowhead
988 (MO)	~95K calls + 13K chat + 24K text answered in MO in 2025; Columbia Missourian in-state answer rate ~94%; WGEM ~17 sec answer WGEM	SAMHSA goal ≥90% in-state	Strong; surge plan for World Cup not publicly published
988 (KS)	5 in-state centers; >90% in-state answer rate after Mar 2025; 25,432 calls (Aug 2023–Jul 2024)	—	Wyandot Center (KCK) recently joined — capacity ramp ongoing
211 (KCMO)	United Way of Greater KC: ~347,000 contacts in 2025; 90% need-met rate; 24/7; multilingual interpretation	Inform USA accreditation (held)	No publicly documented World Cup integration with EOC/911
311 (KCMO)	myKCMO app + 816-513-1313, M–F 8a–7p; interpreter available via email	—	Limited hours = surge risk; not 24/7 during tournament
LEPC / hazmat	Mid-America HazMat & Emergency Preparedness Alliance (MAHEPA) — 8	EPCRA / SARA Title III	Anhydrous ammonia (>3.4M lbs), chlorine

Domain	Current Posture (May 2026)	Benchmark / Standard	Gap or Risk Flag
	counties (Cass, Clay, Jackson, Platte, Ray + Johnson KS, Leavenworth, Wyandotte); regional plan active		(>2.6M lbs), sulfuric acid (>4M lbs) inventoried in region
Poison Control	Missouri Poison Center (SSM Cardinal Glennon, St. Louis) — sole MO accredited center; 1-800-222-1222	AAPCC	Surge protocols not publicly disclosed
Flash flood risk	Brush Creek (1977: 25 dead, 1998 fatalities, 2017 record floods on Indian Creek/Tomahawk Creek); flood corridor near Country Club Plaza, southern KCMO	NWS Pleasant Hill	June–July 2026 climate outlook elevated for storm potential
Severe weather	NWS Kansas City/Pleasant Hill issues alerts; outdoor sirens; SAME-coded NOAA Weather Radio	—	Tornado climatology for late-June lower than peak May, but not negligible

Details by Domain

1. PSAP / 911 Infrastructure

Staffing. As of November 2025, KCPD reported it had filled all funded 911 call-taker positions for the first time since 2020, with training success rates increased from 6% to 75–80% (KCTV5, 11/19/2025). At a February 2026 Board of Police Commissioners meeting, Capt. Caleb Lenz reported 50 call-takers and 30 dispatchers handling roughly one million calls per year (KCTV5, 2/24/2026). The 2026 mayoral budget proposes a 5% KCPD increase including 50 additional officers and 20 additional call-takers/dispatchers (Axios KC, 2/11/2026). Starting salary rose to $52,068 effective May 1, 2025 (up from $48,132) (KCTV5, 4/30/2025). KCTV + 6

Performance. In May 2025, average answer time was 55 seconds with a 17-minute longest wait; by January 2026, KCPD reported 20-second average wait, a roughly 60% reduction (KCTV5, 11/2025 and 2/2026). NENA's industry standard is 90% of calls answered within 15 seconds, 95% within 20 seconds (NENA-STA-020.1-2020). Historical baseline: in May 2023 only 41% of KCPD calls hit the 15-second goal; in October 2023 average wait was 34 seconds with one outlier at 11 minutes (KCUR, 6/28/2023; 11/16/2023). For comparison, KCFD averaged 9 seconds answer time with 91% within 15 seconds in 2023. KCTV + 7

Technology. MARC operates the regional NG911 system with backup PSAP locations including KCPD South Patrol, Overland Park, Johnson County, Platte County, and Independence (MARC NG911 presentation). KCPD plans a $3–3.5M call-center upgrade. Peregrine analytics support supervisor staffing decisions. KCFD's 2023 memo opposed the auto-attendant menu approach as risking duplicative dispatch; that concern is unresolved in public record. Mid-America Regional Cou…

AAR for 2024 events. No publicly released after-action report from the February 14, 2024 Chiefs Super Bowl parade mass shooting (1 killed, 22+ wounded) is available. KCFD reported 8 immediately life-threatening + 7 life-threatening transports across multiple hospitals; Children's Mercy treated 12, with 11 children aged 6–15. The 2025 Super Bowl celebration deliberately omitted a public rally in response. **Significant preparedness unknown**: published lessons learned from 911/dispatch performance during the parade shooting. ABC News Fox News

2. Multilingual / Cross-Cultural Call-Taking Capacity

Vendor. RapidSOS HARMONY AI — purchased by MARC for regional deployment — went live for KCPD in early 2026. According to KCTV5 (4/13/2026), automatic call translation covers ~50 languages; text-to-type translation covers ~147 languages; the system can switch languages mid-call (e.g., French → Dutch → Arabic). Blue Springs and other regional PSAPs have also onboarded the Communicator module. RapidSOS describes its FIFA 2026 readiness offering as a "playbook for major events" with real-time translation and operational continuity (RapidSOS marketing materials). KCTV + 2

Dispatch ontology risk. Risk vector not publicly addressed: international callers may use native emergency-service vocabulary (French *SAMU*/*pompier*; German *Notarzt*; Brazilian *SAMU*; Spanish-language *bomberos*; Dutch *112*; Arabic emergency idioms). Translation fidelity for these terms — and whether call-takers are trained to map them to KC dispatch categories — is **not documented in public record**. Likely-documented-but-not-public.

Comparable deployments. Doha 2022 recruited 57 new public safety telecommunicators, traveling to Jordan and India to staff a multilingual, multinational ECC (APCO PSC, 2024 Jones case study). Seattle 2026 OEM is coordinating ~40 agencies through a unified command; no public disclosure of multilingual PSAP-specific buildout. Industry observers (Pocketalk, RapidSOS) treat language access as critical infrastructure peer to transportation/security. APCO International + 2

3. FIFA 2026 Kansas City Planning

Matches. Six matches at GEHA Field at Arrowhead Stadium (rebranded "Kansas City Stadium"): Jun 16 (Argentina v. Algeria, 9 PM ET); Jun 20 (Ecuador v. Curaçao, 8 PM ET); Jun 25 (Tunisia v. Netherlands, 7 PM ET); Jun 27 (Algeria v. Austria, 10 PM ET); Jul 3 (Round of 32, 9:30 PM ET); Jul 11 (Quarterfinal, 9 PM ET). Four team base camps in metro — Argentina, England, the Netherlands, Algeria (Lawrence). Approximate visitor projection: 650,000 across the tournament window (KCUR, KCTV5). Suntimesnews + 6

Coordination. KC2026 (501(c)(4) host committee, CEO Pam Kramer) coordinates with FIFA; MARC supports via Homeland Security Coordinating Committee and the regional emergency services group (Dan Manley, project manager). FBI Kansas City Field Office is "fully engaged"; Co-Deputy Director Andrew Bailey participated in April 13, 2026 roundtable. KCPD command-post bus and drone capability deployed in 2026. Hoodline + 6

Funding. $59M from FEMA's FIFA World Cup Grant Program flows through Missouri DPS/Office of Homeland Security as the State Administrative Agency on behalf of MO and KS; $14.2M counter-UAS via Missouri (with $11M sub-allocation to KCPD). Total ~$73.8M federal grant + ~$6.1M Cleaver-secured appropriations = ~$80M. MARC administers $59.5M with a $400,000 contract (MARC board, May 2026; The Beacon). Hoodline + 6

Executive Order 26-11 (Gov. Kehoe, April 13, 2026). Activates Missouri State Emergency Operations Plan; activates MO National Guard QRF (~110 personnel); invokes EMAC; supplies SEMA SEOC activation for situational awareness; expires July 31, 2026. First Alert 4 + 6

Public health/medical. University of Kansas Health System named Official Medical Services Provider (Nov 2025). Dr. Erica Carney (KCMO medical director), KCFD Chief Oversight Firefighter Paramedic Ryan Koehler, and KCPD Capt. Abigail Martinez briefed the FIFA Safety & Security Conference (Atlanta). University of Kansas Healt…

Exercises. April 21, 2026 full-scale tabletop at the National WWI Museum & Memorial (Fan Festival site). KCK PD/FD ran joint MCI-response training in April 2026. Kansas City Missouri Polic…

4. 211 / 311 / 988 Integration

211. United Way of Greater KC handled 347,000+ contacts in 2025 with a 90% needs-met rate; sole Inform USA-accredited regional center; 24/7; multilingual interpretation; database of 7,000+ services across 23 counties. Unitedwaygkc

311. myKCMO app + web + 816-513-1313, M–F 8a–7p; language interpreter via email request with 24–48-hr response. **Risk flag:** non-24/7 hours mean 311 cannot absorb spillover during overnight match windows. City of Kansas City

988. Missouri: ~95K calls, 13K chats, 24K texts in 2025; ~94% in-state answer rate; ~17-second answer; 6 call centers + 1 text/chat center; geo-routing now active with AT&T, Verizon, T-Mobile (MO DMH). Kansas: 5 centers (Headquarters Lawrence, Johnson County Crisis Line, COMCARE Sedgwick, Wyandot Center KCK, HealthSource Topeka); in-state answer rate ≥90% after March 2025 (KDADS year-3 report). Columbia Missourian + 6

Integration with 911/EOC. No publicly documented formal World Cup integration doctrine joining 211/311/988/911 under a single dashboard or EOC liaison. **Likely-documented-but-not-public.**

5. Hazmat / Chemical Incident Protocols

LEPC. Mid-America HazMat & Emergency Preparedness Alliance (MAHEPA, formerly Mid-America LEPC) covers 8 counties (Cass, Clay, Jackson, Platte, Ray in MO; Johnson, Leavenworth, Wyandotte in KS). MAHEPA Regional Hazardous Materials Emergency Preparedness Plan (RHMEPP) is the operative document (most recent version published 2023). Inventories include >4M lbs sulfuric acid, >3.4M lbs anhydrous ammonia, >2.6M lbs chlorine in the region (per MARC LEPC base plan). Mid-America Regional Cou…

Plume modeling / CAD integration. Not publicly detailed; **likely-documented-but-not-public**.

Shelter-in-place vs. evacuation. Authority rests with local incident command (county/city EM coordinators) under each jurisdiction's emergency operations plan; activation flows through MARC's regional 911 system to IPAWS COGs.

Poison Control. Missouri Poison Center at SSM Health Cardinal Glennon Children's Hospital (St. Louis), 1-800-222-1222, accredited by AAPCC, sole designated MO regional center. Real-time surveillance uploads every 8 minutes to AAPCC + every 15 minutes to MO DHSS. Surge plan for World Cup not publicly disclosed. Missouri Poison Center + 2

6. IPAWS / WEA / EAS Alert Authority

Authority. Multiple Collaborative Operating Groups (COGs) hold IPAWS permissions in the region: state-level (MO DPS, KS Adjutant General); county-level (Johnson Co. KS via Johnson County Central Dispatch E-911; Wyandotte; Jackson Co. MO; Cass; Platte; Clay); city-level (KCMO Office of Emergency Management); NWS Pleasant Hill office; KMOX-AM and WHB-AM are Missouri Primary Entry Points per the Missouri EAS Plan. Sbe55

Latency in compound emergency. No publicly documented standardized maximum-time-to-alert metric for KC. Atlanta 1996 lessons (HSAJ Centennial Park bombing analysis) showed 6-step communication chain creating ~20 minute theoretical latency; modern IPAWS dashboards have collapsed this, but cross-jurisdictional bistate alerts in compound scenarios remain a stress test.

Multilingual WEA. FEMA WEA supports Spanish in addition to English nationally; **no public documentation of additional language WEA capability for KC during World Cup**. This is a flagged preparedness gap given 7+ international fan bases.

Exercises. Tabletop exercises noted at Federal/state level; specific KC-focused IPAWS-using exercise records not publicly indexed in 2024–2026. Likely-documented-but-not-public.

7. Hospital / Public Health Surge

Trauma capacity.

- **University of Kansas Hospital** (Kansas City, KS): ACS Level I Trauma Center since Sept 2000; 3 helipads; Burnett Burn Center (only adult/peds ABA-accredited burn center in region); on standby for VIP visits; official medical provider for Chiefs/Royals/KC2026. The University of Kansas H…
- **University Health Truman Medical Center** (KCMO): Missouri-designated Level I Trauma; 48 ED beds; ~62,000 ED visits/yr; ~1,200 trauma cases/yr. University Health University Health
- **Children's Mercy Adele Hall Campus**: only Level I Pediatric Trauma Center between St. Louis and Denver; 366–390 beds; Level IV NICU; member, Pediatric Pandemic Network. Wikipedia Children's Mercy Kansas City
- **Saint Luke's Hospital of Kansas City**: Missouri Level I Trauma Center.

Surge projection. Rep. Sharice Davids cited a 6–8% surge in healthcare needs estimate during the tournament. The University of Kansas Health System (Dr. Bryan Beaver) is leading public health/medical planning. House + 4

EMS mutual aid. Johnson County Med-Act activated an "all-hazards plan" (KCTV5, 3/5/2026); Med-Act explicitly flagged that **no federal or state funding mechanism exists to bring EMS resources from outside the metro** despite all metro agencies needing simultaneous surge support. Pulsara patient-tracking platform go-live: May 1, 2026. KCTV

Heat protocols. FIFA: 3-minute hydration breaks midway each half regardless of conditions; up to 5 substitutions; ≥3 rest days between matches; climate-controlled benches; matches strategically timed (KC matches all evening — 7 PM, 8 PM, 9 PM, 9:30 PM, 10 PM ET — which mitigates worst heat exposure). Cooling and medical stations planned at fan zones. NBC 6 South Florida + 2

Public health declaration thresholds. Both states permit local health authority declaration; activation paths run through Missouri DHSS and KDHE respectively. **Specific FIFA-tied declaration criteria not publicly published.**

8. Cross-Jurisdictional Coordination (MO/KS)

MARC. Operates regional 911 system, Homeland Security Coordinating Committee, and emergency services group spanning 9 counties / 119 cities. Hosted 65 trainings + 12 exercises in 2024 ahead of World Cup. Administers $59.5M FWCGP via the $400K KC2026 contract. Mid-America Regional Cou…

Mutual aid. Activated under EMAC by EO 26-11; Missouri State Highway Patrol, National Guard, FBI rotation, and out-of-state mutual aid all enabled. Internal metro mutual-aid agreements via MARC Regional Coordination Center. The Beacon

Bistate command. State unified command structure on game/festival days planned but final command-and-control diagram not in public record. Johnson County United (Kansas-side coordination) supported by Rep. Davids' office; $100M federal transit investment secured.

Wyandotte County Emergency Management maintains its own EOP; KCKPD expects $1–2M of the $59M federal envelope per Chief Karl Oakman. House WIBW

9. Weather / Environmental Risk

NOAA outlook. NWS Climate Prediction Center summer 2026 outlook (released April 2026; updated April 22) shows above-normal temperatures projected for ~36 states; Kansas/Missouri Plains region is included in elevated-temperature signal but Upper Midwest (a "cool pool" centered over Iowa/Missouri/Wisconsin) shows mixed/near-normal patterns. CPC Central Region outlook (April 20, 2026) flags 60% of CONUS in some drought condition; favored below-normal precipitation to worsen Plains drought; El Niño Watch in effect with 85%+ probability of formation per IRI April models. Old Farmer's Almanac and private forecasters lean hotter. Weather On This Day + 4

Heat history at Arrowhead. June–July averages 80–95°F; humid continental climate. KC matches all scheduled at 7–10 PM ET, mitigating worst exposure but increasing overnight EMS load and post-match transit strain.

Flash flood precedent. Brush Creek 1977 ("the Plaza Flood"): 25 dead, $80–100M damage. 1998 repeat. 2017 (Jul 26–27): record flooding on Indian Creek (Overland Park, KS) and Tomahawk Creek (Leawood); 5–7" rain in 3 hours; numerous swift-water rescues including a televised rescue at 103rd & Wornall. Country Club Plaza, fan-density corridors, and several proposed Park & Ride sites sit within or near these flood paths. Usdeadlyevents National Weather Service

Tornado climatology. Late-June/early-July tornado risk lower than April–May peak but non-trivial in Tornado Alley; outdoor warning sirens, NOAA Weather Radio (SAME-coded), and IPAWS WEA all in place.

Air quality / wildfire smoke. No public KC-specific 2026 World Cup wildfire-smoke contingency. Heat–ozone interaction protocols default to NWS and EPA AirNow advisories.

10. Benchmark Comparisons

FIFA 2026 peer host cities.

- **Seattle**: 40-agency unified command hub; expanding stadium-district surveillance and ALPRs; AlertSeattle multilingual sign-up alert system. FOX 13 Seattle FOX 13 Seattle
- **Dallas/North Texas**: Hosting 9 matches (most in tournament) + International Broadcast Center; Texas state $116M public-safety grant via Governor's Public Safety Office. ShareAmerica + 2
- **Los Angeles, NY/NJ, Miami, San Francisco Bay, Boston, Philadelphia**: All have published high-level safety frameworks; specific PSAP-multilingual buildouts not uniformly disclosed in public record. Multiple cities (Seattle, Dallas) using RapidSOS or comparable AI translation. Los Angeles and NYC are charging Fan Festival admission, unlike KC. KCUR

- **Houston**: Texas grant and host city task force run separately; RapidSOS pitched its FIFA major-events playbook to host cities broadly. StateScoop

Doha 2022 (Qatar). Recruited 57 multilingual telecommunicators internationally; conducted system-wide MCI tabletop exercises (Alinier et al., 2023, *J. Contingencies and Crisis Mgmt*); WHO/MoPH "Sport for Health" partnership ran event-based surveillance and risk communications. The 2021 FIFA Arab Cup served as live-system pretest. APCO International + 3

Russia 2018, Olympics legacy. Atlanta 1996 Centennial Park bombing — long-cited as cautionary case for special-event communications: a 6-link communication chain meant a 911 call from a payphone outside the venue had to traverse multiple command centers before reaching officers ~100 yards away (HSAJ "Strategic Logic of Special Event Security"). Salt Lake 2002 lessons: clear pre-Games communications plan was decisive; not every soft target can be hardened, so high-risk auxiliary events should be cancelled or hardened individually. Atlanta 1996 also demonstrated the value of integrating law enforcement, EMS, mass care, fire, and EM into one consolidated response (response to Centennial Park pipe bomb) — a model that informs KC2026's multi-agency footprint. Hsaj GovInfo

Industry guidance. APCO Project 43 (Broadband Implications for the PSAP), APCO/NENA ANS 1.107.1.2015 (PSAP QA/QI standards), NENA-STA-020.1-2020 (call answering standard), and NFPA 1225:2022 (Emergency Service Communications) all govern. APCO 2026 conference (San Antonio, August) will postdate the tournament — i.e., post-event AAR cycle. IAEM-USA materials on mass-event coordination supplement. APCO International + 3

Caveats and Data Gaps

Significant preparedness unknowns (information critical for readiness assessment that does NOT appear to be publicly documented):

1. **Tail-end (95th/99th-percentile) 911 answer time under simultaneous events** (e.g., crowd dispersal + flash flood + hazmat). Average wait time alone obscures surge brittleness; the May 2025 17-minute outlier illustrates the gap between mean and tail.
2. **Dispatch ontology mapping for non-English emergency-service vocabulary** within the RapidSOS-augmented workflow. AI translates language; it does not necessarily reconcile that "pompier" maps to "fire department."
3. **Multilingual WEA/EAS capability** for KC's COGs beyond English (and where applicable, Spanish).
4. **Compound-emergency IPAWS latency benchmark** (time from incident verification to WEA broadcast) for bistate scenarios.
5. **EMS mutual-aid funding mechanism** for resources outside the immediate metro — explicitly flagged as a gap by Johnson County Med-Act. KCTV

6. **Public-facing AAR for the February 14, 2024 Chiefs parade mass shooting** — particularly the dispatch/911 performance during the mass-casualty event.
7. **Specific KC-tailored heat-illness surge thresholds** that would trigger cooling-center activation, transit interventions, or game-time medical augmentation.

Likely-documented-but-not-public (commonly held internally by EM stakeholders):

- KC2026 Operations Plan (referenced repeatedly but not in public domain)
- KCPD Communications Unit COOP plan
- MAHEPA event-specific hazmat annex for Fan Festival/stadium proximity
- Detailed unified-command organizational charts including bistate liaison positions
- Plume modeling protocols and CAD integration specifics
- 211/311/988/911 inter-agency surge coordination MOUs (if any)
- Tabletop exercise after-action reports from April 21, 2026 WWI Museum FSE and from the 2025–2026 MARC training cycle (65 trainings, 12 exercises)

Source quality and recency notes. This research draws on government primary sources (FEMA, NOAA NWS Pleasant Hill, NENA, APCO, MARC, MO DMH, KDADS, KS Adjutant General, FCC, Congress.gov), municipal sources (KCMO, KCPD, KU Health System, University Health, Children's Mercy), peer-reviewed and industry literature (APCO PSC, JMIR Public Health Surveillance, *J. Contingencies and Crisis Management*, Wiley), and well-sourced regional journalism (KCUR, KCTV5, KSHB, The Beacon, Axios KC, Kansas Reflector, Missourinet). Where forward-looking statements appear (e.g., "Kansas City will be the most prepared," "no credible threat at this time," NOAA seasonal probabilities), they have been quoted as projections rather than as established outcomes. Several economic-impact figures ($163M Kansas economic impact, $650M regional impact) originate with KC2026 promotional materials and have not been independently verified. KCUR Missourinet

Date currency. Research compiled May 2, 2026 — six weeks before Kansas City's first match (June 16, 2026). Several preparedness elements (final unified-command diagram, ConnectKC26 booking system, heat protocols at WWI Museum Fan Festival) were still being finalized at the time of this report and may have updated since.
